Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a semiconductor integrated circuit, classified in class 716, subclass 7, 11-19.
 - II. Claims 5-13, drawn to the liquid crystal display (LCD) control unit, classified in class 345, subclass 52.
 - III. Claim 14, drawn to the mobile electric equipment, classified in class 455, subclass 154.
2. Inventions of group 1-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has separate utility such as semiconductor integrated circuit which does not operate a LCD control unit by group II. Invention of group III has separate utility as mobile electronic telephone which does need to operate integrated circuit by group I or LCD control unit by group II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
